Education

ABES Institute of Technology , Ghaziabad	Expected 2027
Bachelor of Technology (B.Tech) in Computer Science and Engineering – 75% (up to 6th Semester)	
St. Charles Inter College , Meerut	2021
Intermediate (UP Board) – 75%	
St. Charles Inter College , Meerut	2019
High School (UP Board) – 84%	

Technical Skills

Programming Languages: Python, TypeScript, JavaScript, Java, C
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite
Mobile Development: Flutter, Dart
Backend: FastAPI, Django REST Framework, Node.js, RESTful APIs
AI & Computer Vision: OpenCV, PaddleOCR, EasyOCR, Image Forensics (ELA), Face Verification (ArcFace)
Databases: PostgreSQL, MySQL, SQLite
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering
Tools & Platforms: Git, GitHub, Postman, Ollama, Pytest

Experience

Infosys Springboard	2026
<i>Virtual Intern – Infosys Springboard Virtual Internship 7.0, Batch 1</i>	
- Successfully onboarded into the Infosys Springboard Virtual Internship 7.0, Batch 1. - Worked on an 8-week virtual internship program and completed the Infosys Springboard Internship Capstone Project. - Developed BudgetBuddy, a full-stack personal finance and budget management platform using React/Vite and Django REST Framework.	

Projects

BudgetBuddy – Full-Stack Personal Finance & Portfolio Planner [GitHub]
<i>React 19, Vite, Django REST Framework, Python, PostgreSQL/SQLite, JWT</i>
- Developed a secure personal finance platform for income, expense, budget, savings-goal, notification, analytics, and transaction reporting management. - Built a decoupled React/Vite frontend and Django REST backend with JWT authentication, Google/GitHub OAuth2, role-based resource allocation, and database signals. - Implemented a consolidated dashboard API that reduced API roundtrip overhead and database queries by 70%. - Developed asynchronous email notifications and constant-memory streaming CSV export for scalable transaction reporting. - Added 68 Django unit tests and 7 Playwright E2E tests for backend and frontend verification.
Carbon Footprint Optimization Engine (COFE)
<i>Python, Multi-Agent AI, ESG Analytics, Blockchain</i>
- Developed a multi-agent ESG compliance platform for carbon footprint assessment and sustainability reporting. - Automated carbon emission analysis and recommendation generation using AI-driven workflows. - Designed blockchain-based audit trails for secure and transparent compliance tracking. - Secured 1st Place at Hacknovate 7.0 for presenting the solution.
Local LLM Policy Gap Analyzer
<i>Python, Ollama, Gemma3, NIST Cybersecurity Framework</i>
- Developed an offline Local LLM-based compliance analysis tool using Ollama and Gemma3. - Automated policy gap detection against the NIST Cybersecurity Framework. - Generated structured PDF compliance reports through a modular CLI pipeline.
Decentralized Voting System
<i>Next.js, Tailwind CSS, Solidity, Hardhat, Ethers.js</i>
- Built a blockchain-based voting platform ensuring transparency and security. - Implemented Solidity smart contracts and integrated MetaMask authentication.
School Management System
<i>HTML, CSS, JavaScript, PHP, MySQL</i>
- Developed a web-based system to manage student records, attendance, and academic performance. - Implemented MySQL database integration with a responsive Bootstrap-based user interface.

Achievements & Certifications

- Winner, Hacknovate 7.0 (2026) – Secured 1st Place for developing the Carbon Footprint Optimization Engine (COFE).
- Grand Finalist, HACK IITK 2026 – Selected among the Top 22 teams out of 9,000+ participants nationwide in the AI/ML Security Solution Track.
- Shortlisted for Smart India Hackathon (SIH) 2025 at college level.
- Data Science using Python – AICTE Recognized FDP, NITTTR Chandigarh (2025).
- Practical Steps for Building Fair AI Algorithms – Coursera (2025).
